\* Receive messages automatically and send email from your BlackBerry® — the messages appear in your 'Sent' items. Your device and email service synchronize automatically to display the same messages.

\* "Phishing" fraud protection. Powerful technologies like Sender ID spot email that's not from whom it claims — before it hits your inbox.

\* Spam filtering. This smart technology identifies spam before it can become a nuisance. And you can train it to learn and defeat new spam techniques as you go.

\* Virus protection. Keeps your computer safe from the malicious viruses that lurk in innocent-looking emails.

\* 256-bit encryption. When using Web-Based Email, protect your personal, business, financial, legal or medical information — keep your email contents and attachments private with rock-solid, industry-leading protection.

\* Auto-Save saves your drafts even if you're interrupted mid-sentence. No more worries about losing an email due to a mistaken click, computer glitch or "oops."

\* NEW! SMS/Text-Mail Service. Web-based email subscribers can instantly send both text messages and standard email.

\* And much more!
